

PRODUCT INFORMATION

WG430-2PU GLASS CLOTH

BENEFITS

The glass cloth WG430-2PU consists of 6-9 micron E-glass fiber strands.

The glass cloth WG430-2PU is inorganic, sterile, refractory, containing no toxins or heavy metals and does not cause skin irritation.

The glass cloth has been PU-coated on both sides. It is a grey coating which makes the fabric water resistant and cut resistant.

PU-coating does not reflect UV light.

MATERIAL

- E-glass
- Glass cloth 430 g/m²
- PU-coating

SPECIFICATION

Length	50 m
Thickness	0,45 mm
Temperature	550 °C
Color	White / Grey
Width	1,000 mm
Total weight	480 g/m ²

Application	Insulation, welding protection, compensators
Flammability	Inflammable
Thread	EC 9 136
Threads	19 x 11 cm ²
Type of weave	Satin
Coating	PU
