

## PRODUCT INFORMATION

# TEADIT 2027L BRAIDED PACKING

## BENEFITS

Teadit 2027L is diagonally braided from textured, high quality fiberglass impregnated yarn. The packing is impregnated with pure graphite powder and a corrosion inhibitor.

The graphite process reduces the corrosion of the glass fibres – and furthermore saves the graphite fibres from wear and damaging each other under pressure.

Type 2027L is an efficient and pliable packing for static applications.

## MATERIAL

- E-Glass
- Graphite
- Lubricant

## SPECIFICATION

Dimensions	4 x 4 mm - 30 x 30 mm
Temperature	+550 °C / + 200 °C (steam)
Pressure (stat.)	150 bar
pH	4-11
Density	1,50 g/cm <sup>3</sup>
