

PRODUCT INFORMATION

REVOSEAL VARIO GASKET

BENEFITS

Revoseal Vario is a high-quality and advanced technology gaskets, used where standard gaskets will be insufficient.

Revoseal gaskets stand out by having the lowest leak rate of all gaskets available on the market.

The Revoseal Vario is a universal centering system that replaces 8 different gasket dimensions with different pressure, and in the ANSI and DIN standards.

These gaskets are also available in PTFE version with EC1935-2004 for food production.

- Significant reduction of range
- Accurate centering of the gasket
- Significant cost savings in purchasing and inventory
- No danger of fitting the wrong gasket
- Easy to fit
- No leakage, good for the environment
- Temperature: -200°C – 1000°C
- Pressure: from vacuum to 400 bar

MATERIALS

- Stainless steel 316Ti
- Graphite (also available with PTFE for food)

SPECIFICATION

Temperature	-200°C - 1000°C
Pressure	From vacuum to 400 bar
Thickness	4.2 mm (+/- 0.1 mm)
Flange	DIN and ANSI
Firesafe	API 607 (also for PTFE)
Blow-out	VDI 2200

USES

ANSI FLANGE

DIN FLANGE
