GENERAL INFORMATION

STEFFCA A/S is among Denmark's premier gaskets, seals, and insulation solutions suppliers. We are dedicated to delivering the highest service, quality, innovation, and timely delivery. We understand the critical importance of prompt solutions in your operations.

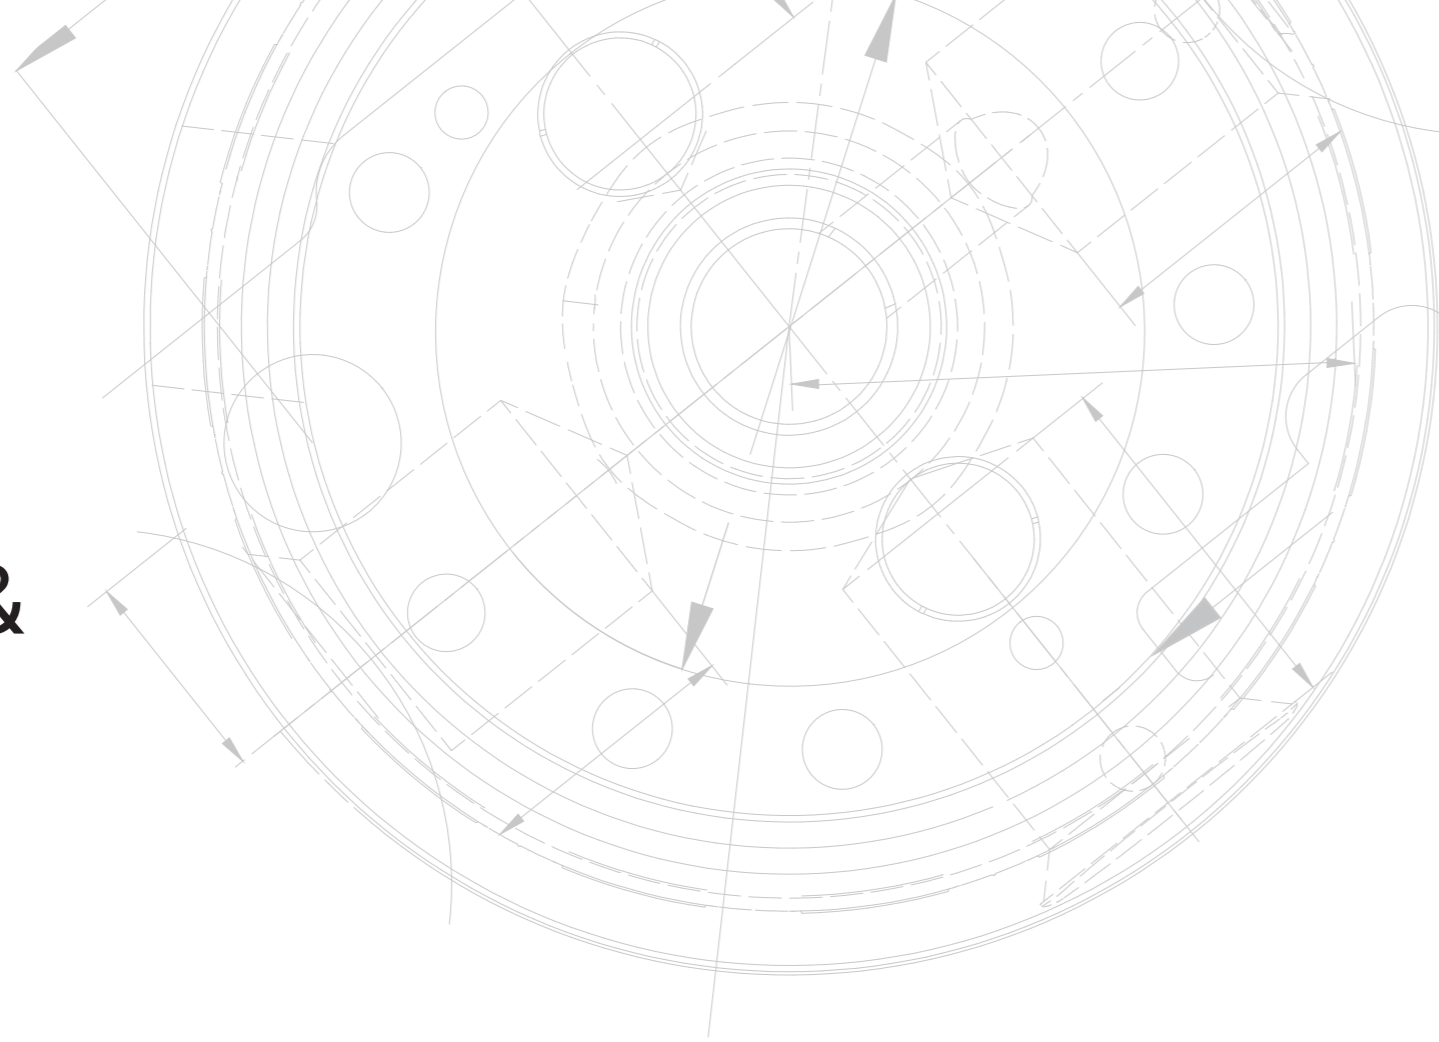

Our continuous development of products and solutions positions us as the optimal partner for our customers. Utilising cutting-edge technology and maintaining a strong focus on quality, we ensure excellence in all aspects of our work.

We serve diverse industries, from pharmaceuticals to offshore, and provide professional solutions to Danish and international markets.

At STEFFCA A/S, we are committed to being a responsible company. Our dedication to reducing emissions, promoting social justice, and practising ethical leadership is evident in our strong emphasis on ESG (Environmental, Social, and Governance) principles. This commitment is reflected in our climate report and ESG report, which are available on our website.

At STEFFCA, social responsibility is a vital part of our DNA and the foundation of our business. We ensure that every member of the STEFFCA team thrives and has the best opportunities for personal and professional development.

FOCUS ON QUALITY, INNOVATION & RELIABILITY

Every day, we advise our customers on choosing the right gasket, seal, and insulation solutions. Our team is highly trained and possesses broad technical knowledge within our core competencies. No matter the industry, we deliver qualified support based on more than 30 years of experience.

Together with our customers, we constantly strive to optimise and develop our product range. Our main goal is always to deliver the best possible customer service while offering the highest quality, focused innovation, and speedy delivery.

QUALITY

Our customers need high-quality solutions. Quality is the main objective in everything we do.

All our products undergo strict quality control to meet the industry's highest demands and standards. We focus on mechanical quality, chemical resistance, weather resistance, pressure, temperature, safety, and special international approvals.

Furthermore, it is important to us that we are ISO 9001:2015 certified, a global standard for quality management. The ISO 9001 standard ensures, through policies and procedures, that we deliver gaskets and seals that comply with customer requirements and expectations as well as applicable laws.

INNOVATION

It is not just about fulfilling the customers' requirements but also about anticipating them.

We constantly strive to develop our products and solutions to be the best business partner possible.

We have focused on new materials and manufacturing processes to be on top of the demands of our customers.

It is important to us to use the newest technology in our production so we can develop new gasket, seal and insulation solutions in close cooperation with our customers.

RELIABILITY

We always aim to achieve the fastest delivery time for our customers.

We regard it as a key objective to offer the fastest delivery time possible to help our customers maintain optimal flow in their production.

We always have a substantial quantity of standard gaskets and seals in stock.

Our in-house production capacity and raw material stock guarantee fast processing of gasket and sealing solutions for our customers.

CSR – VITAL PART OF OUR DNA

At STEFFCA, social responsibility is a vital part of our DNA and the foundation of our business. We want to offer a working environment with room for everybody – and everybody is equally important.

EMPLOYEES IN FOCUS

We strive to create an attractive working environment to attract and retain qualified employees who want to stay long-term. It is essential to us that all our employees thrive and continue developing themselves.

SOCIAL RESPONSIBILITY

All employees are involved in creating a good work environment. For instance, a workshop was held where areas of focus were established, including health. Further, social events occur regularly to strengthen employee bonds throughout the company.

ROOM FOR EVERYBODY

We want to be a company that embraces all kinds of people and helps those who need help finding a job due to various issues.

We offer sheltered jobs and flexible working hours to employees who have faced reduced workability due to illness since we want to keep our employees in the company for as long as possible.

DONATIONS/SPONSORSHIPS

We are crucial to supporting initiatives that enhance social responsibility. STEFFCA supports the local community through Nyborg Voldspil and SUS Nyborg. Additionally, we sponsor the Odense Handball women's team. We have also donated to the Danish Red Cross and the Danish Cancer campaign, called Knæk Cancer.

SUSTAINABILITY – BUILT ON RESPONSIBILITY

We are a responsible company that strongly focuses on reducing our emissions, promoting social justice, and practising ethical and responsible leadership. Therefore, we have prioritised our ESG (Environmental, Social, and Governance) efforts.

ENVIRONMENTAL

We have mapped all our emissions in Scope 1, 2, and 3 in accordance with the Greenhouse Gas Protocol, which you can see on our website. It is essential for us to map all our emissions because we want to be a transparent and responsible company with a strong focus on sustainability. We understand the crucial role of calculating and reducing emissions in promoting environmental responsibility and advancing sustainable practices.

SOCIAL

We want to cooperate actively with our suppliers to ensure that our production is carried out responsibly and that our suppliers uphold ethical standards.

We are focused on job security and staff well-being. We want our colleagues to feel safe at work and to help each other ensure that we have a safe and healthy work environment. We do not tolerate harassment and bullying. We strive to be an inclusive workplace by employing people who may otherwise have difficulty finding a job. It is our social responsibility to help individuals develop and move forward.

GOVERNANCE

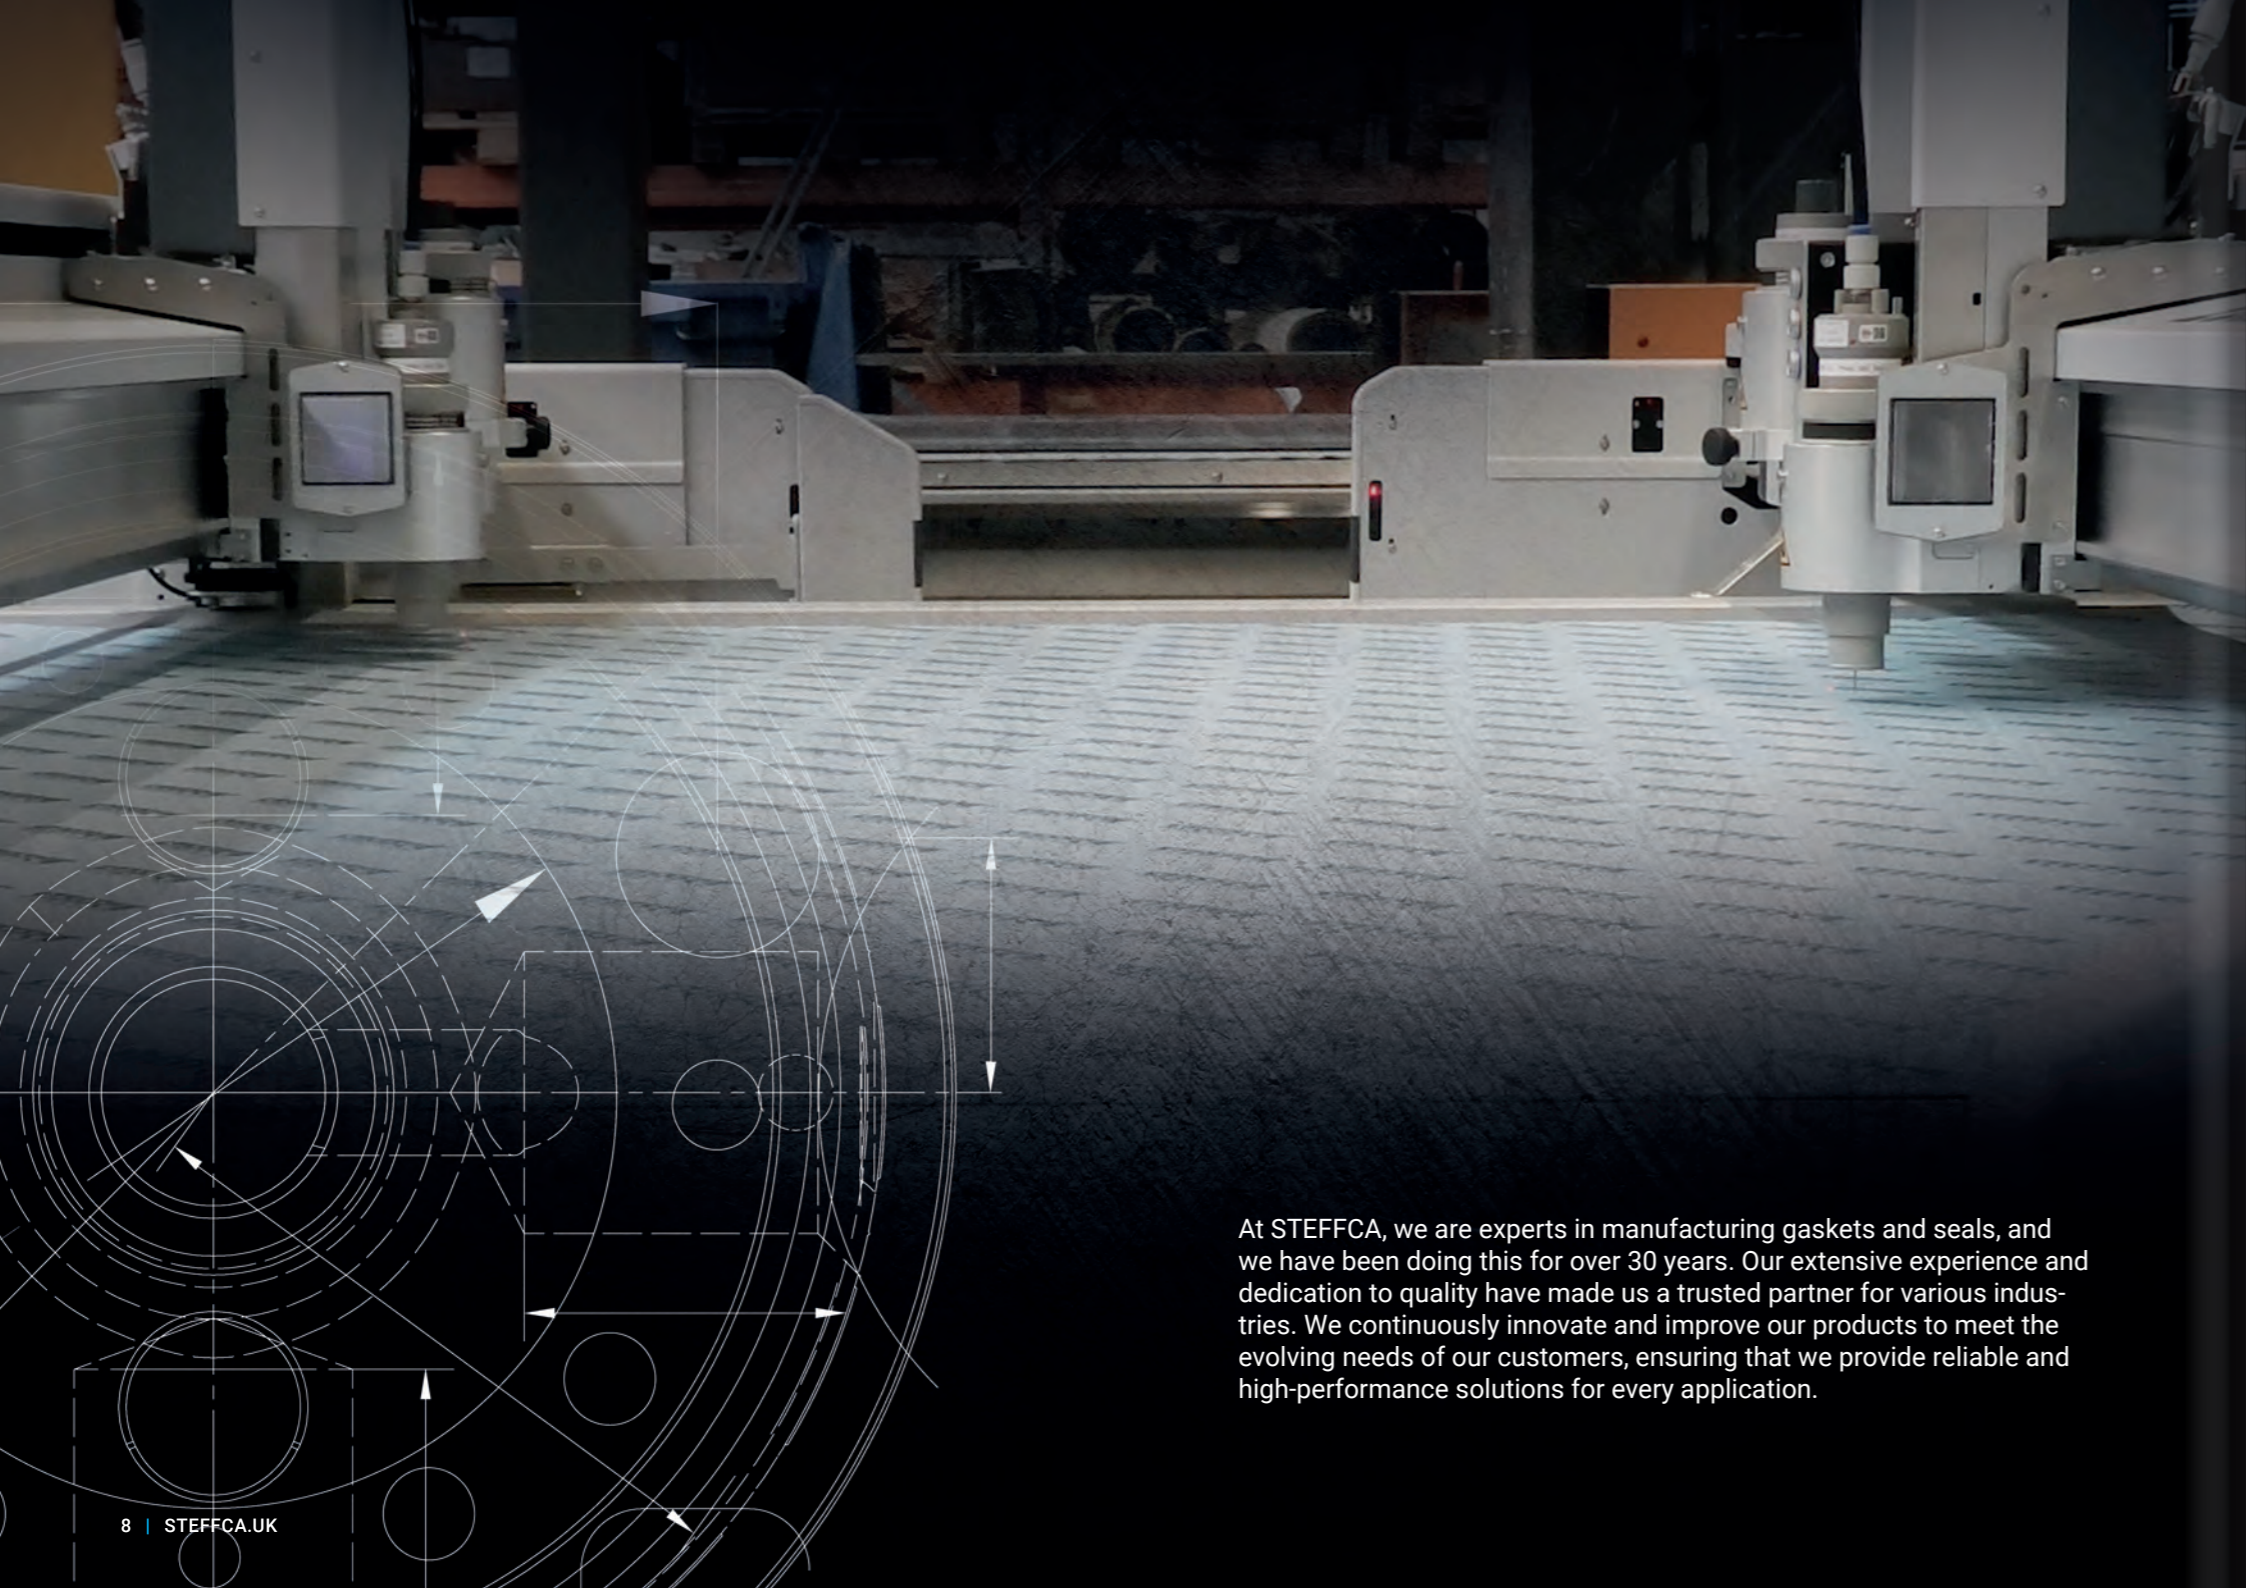

Our management culture is based on transparent and ethical leadership, where compliance with legislation is a given. We are committed to the climate, the environment, and human conditions while maintaining responsible economic operations.

Our corporate culture is anchored in our code of conduct. It is important that every employee not only complies with legislation but is also supported to act with integrity and responsibility. We have documented important policies in our employee handbook.

We are ISO 9001:2015 certified, a global standard for quality management. The ISO 9001 standard ensures that through policies and procedures, we deliver gaskets and seals that comply with customer requirements, expectations, and applicable laws.

We will actively work with our suppliers to ensure responsible production and that our suppliers adhere to ethical standards. Risk assessment throughout the entire value chain is part of our strategic work.

Our ESG report is to be found on our website.

GASKETS & SEALS

– EXPERT KNOWLEDGE & INNOVATION

At STEFFCA, we are experts in manufacturing gaskets and seals, and we have been doing this for over 30 years. Our extensive experience and dedication to quality have made us a trusted partner for various industries. We continuously innovate and improve our products to meet the evolving needs of our customers, ensuring that we provide reliable and high-performance solutions for every application.

PROFESSIONAL SOLUTIONS

Our broad product range spans simple gaskets and seals to complex, customer-specific solutions. We provide professional solutions for all types of industries, and our customers can be found in nearly all sectors, such as offshore, construction, pharmaceutical, food industry, refineries, energy companies, and many more.

INNOVATION

We constantly strive to develop our gaskets and be the best possible partner for our customers. We prioritise using the latest technology in our production and strongly focus on quality in everything we do.

EXPERT KNOWLEDGE

When choosing materials for gaskets and seals, it is essential for us to ensure optimal and reliable performance under the given operating conditions. Therefore, we have extensive knowledge and focus on mechanical properties, chemical resistance, temperature resistance, pressure resistance, and sealing capability.

QUALITY MANAGEMENT

It is also important for us to be certified according to the ISO 9001:2015 standard, a global standard for quality management. The ISO 9001 standard ensures that, through policies and procedures, we deliver gaskets and seals that meet customer requirements and expectations as well as applicable laws.

INSULATION JACKETS

– OFFSHORE

In the maritime sector, where safety and working conditions are top priorities, STEFFCA's customised insulation jackets are a reliable choice. Tailored to the shipping industry's requirements, our solutions guarantee a safe and optimal working environment on board.

INSULATION JACKETS YOU CAN RELY ON

STEFFCA's fire-retardant insulation jackets are unique, specially designed insulation developed and optimised over several years. Companies such as Maersk, DFDS, Scandlines, and Molslinjen use them in the maritime industry.

The jackets are manufactured to high standards and undergo rigorous quality control to ensure compliance with the industry's highest requirements. They contain high-class insulation material, are sewn with high-temperature thread, and held together with high-quality velcro and metal springs.

IMPROVED WORKING ENVIRONMENT

With STEFFCA's insulation jackets, you provide the crew on board with the best conditions for an efficient

working environment. Our customised jackets are designed to reduce the high temperatures in the engine room by effectively encapsulating the heat from the engines. Additionally, the jackets reduce noise and vibrations, which can be a significant nuisance for the crew on board.

APPLICATION

The insulation jackets are easy to remove for servicing and maintenance, as they can be disassembled without tools. Simply release the velcro and metal springs, making it quick and easy to access the engines and reseal the insulation.

TESTED BY DANISH TECHNOLOGICAL INSTITUTE

The Danish Technological Institute has tested STEFFCA's insulation jackets, ensuring objective testing and independent evaluations of our insulation solutions.

SEA-PROOF

Our customised insulation jackets are designed to withstand the demanding maritime environment. With high-quality materials, we ensure a long lifespan and resistance to seawater, oil, and other chemicals.

INSULATION JACKETS

– GENERAL INDUSTRY

STEFFCA has specialised in customised insulation jackets for the general industry, where energy savings are crucial due to rising energy prices and the need to reduce CO2 emissions to improve the climate footprint.

STEFFCA's custom insulation jackets are a reliable solution for achieving significant energy savings. The insulation jackets can be tailored to all industries and used in, for example, heating plants, production facilities, heat exchangers, and utility installations, where they are typically mounted on flanges, valves, pumps, compensators, motors, etc.

UNIQUE INSULATION SOLUTION

Insulation jackets from STEFFCA are made from specially designed insulation, developed and optimised over several years, and tested by hundreds of companies. Produced to high standards, they undergo strict quality control to meet industry requirements. They include high-class insulation material, are sewn with high-temperature thread and held together with high-quality velcro.

APPLICATION

The insulation jackets are easy to remove for servicing and maintenance. They can be removed without tools by simply undoing the velcro, providing quick and easy access to the pumps and resealing the insulation.

TESTED BY THE DANISH TECHNOLOGICAL INSTITUTE

The Danish Technological Institute has tested STEFFCA's insulation jackets, providing objective trials and independent calculations of our insulation solutions, which are included in the energy report our customers receive. Furthermore, STEFFCA has participated in numerous energy-saving projects involving companies, energy firms, and independent energy advisors.

ENERGY REPORT

After measurement, an energy report is prepared for the units needing insulation. The report shows energy consumption before and after insulation, along with CO2 savings. This measurement also serves as the basis for the custom insulation jackets tailored to the respective units.

GASKET SETS – CUSTOMISED TO YOUR NEEDS

STEFFCA offers individually tailored gasket sets to meet your specific requirements and needs. Our gasket sets ensure your facility is serviced with high-quality gaskets according to your specifications.

DEFINE YOUR NEEDS

By choosing STEFFCA's customised gasket sets, you can define exactly which gaskets suit your needs. You can collaborate with our skilled experts to achieve the perfect match for your requirements.

OPTIMAL AND RELIABLE PERFORMANCE

When choosing materials for gasket sets, it is essential for us to ensure optimal and reliable performance under the given operating conditions. Therefore, we have extensive knowledge and focus on mechanical properties, chemical resistance, temperature resistance, pressure resistance, and sealing capability.

TAILOR YOUR PACKAGING

When choosing gasket sets from STEFFCA, you can customise and tailor the packaging with your logo and corporate identity, where only imagination sets the limits.

At STEFFCA, we understand that every detail matters. That's why we offer a range of packaging options, including bags, shrink-wrap, and recyclable materials, all of which can be tailored to your specific preferences.

When you add your design to the packaging of a STEFFCA gasket set, you're not just customising, you're creating a professional branding experience. This allows you to show your customers you stand for quality throughout the value chain.

WELDING PROTECTION

– A WIDE RANGE FOR EVERY NEED

At STEFFCA, we offer a comprehensive range of welding protection made from quality materials, specifically tailored to the maritime industry. Our commitment to innovation and quality ensures that our solutions are effective and reliable in the most demanding environments.

EFFECTIVE BARRIER AGAINST HIGH TEMPERATURES

STEFFCA's welding protection solutions are designed to provide an effective barrier against the intense temperatures encountered during welding work. Whether you are working in shipbuilding, maintenance, or repairs, our products deliver superior performance and safety. All our products undergo rigorous quality control to meet the highest industry requirements and standards.

PRODUCT RANGE

Our range of high-temperature fabrics and welding protection products is wide, and each possesses unique properties thanks to customised finishes that ensure optimal protection and durability.

We primarily use fibreglass and silica fibre to manufacture our welding protection. Both glass and silica cloth withstand high temperatures, but the silica cloth is designed to withstand even the most extreme temperatures. Additionally, we offer our welding protections with various coatings to precisely meet your specific needs.
