

PRODUCT INFORMATION

ROUND GLASS PACKING

BENEFITS

The round glass packing consists of 6-9 micron E-glass fiber yarns that are texturized.

The glass packing is inorganic, sterile, refractory, asbestos-free, and contains no toxins or heavy metals.

The packing consists of a strong surface of E-glass and a core of longitudinal strands of E-glass. This design provides an extremely durable and mechanically strong packing.

The packing can be delivered in either soft or standard hardness.

MATERIAL

- E-glass

SPECIFICATION

Dimension	Ø 8-100 mm
Temperature	550 °C

Colour	White
Flammability	Inflammable
Application	Packing and sealing
