

PRODUCT INFORMATION

# OPEN MESH BRAIDED GLASS PACKING

## BENEFITS

The packing consists of 6-9 micron E-glass fibre yarns that are texturized.

The open mesh braided glass packing is inorganic, sterile, refractory, asbestos-free, contains no toxins or heavy metals.

It is a soft braided fiberglass packing that has a core of E-glass and on the outside an open, heavy netting of E-glass. This structure provides a very soft and flexible packing that seals closely to the surface.

The packing has also good insulating properties.

## MATERIAL

- E-glass

## SPECIFICATION

<b>Dimension</b>	Ø 6-40 mm
<b>Temperature</b>	550 °C

<b>Colour</b>	White
<b>Flammability</b>	Inflammable
<b>Application</b>	Packing, sealing and insulation
